waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.) Incorporated in the state of
Idaho on January 1, 1980.

1. The source of the proposed appropriation is Underground Well #2
Name of stream, lake, spring, underground or other source

2. The amount of water applied for is 2.67 second-feet
One second-foot equals 448.83 gals. per min.

(a) If stored in reservoir give number of acre-feet _____

3. The water to be used for Mining, Milling and Domestic
Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use.

4. If use is for:

(a) Irrigation, state number of acres to be irrigated _____

(b) Stockwater, state number and kinds of animals to be watered _____

(c) Other use (describe fully under "No. 12. Remarks") Mining, Milling and Domestic

(d) Power:

(1) Horsepower developed _____

(2) Point of return of water to stream _____

5. The water is to be diverted from its source at the following point SW $\frac{1}{4}$, NE $\frac{1}{4}$ Section 10 T28N, R34E MDB
Describe as being within a 40-acre subdivision of public
& M, at a point from which the northwest corner of said Section 10 bears N53°
survey, and by course and distance to a section corner. If on unsurveyed land, it should be so stated.
15' W a distance of 4,490 feet.

6. Place of use Within sections 10, 15, 16, 21, and 22. All in T28N, R34E.
Describe by legal subdivision. If on unsurveyed land, it should be so stated.

7. Use will begin about January 1 and end about December 31, of each year.
Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) Drilled and cased well, pipeline
State manner in which water is to be diverted, i.e. diversion structure, ditches and
distribution system, and storage reservoir.
flumes, drilled well with pump and motor, etc.

9. Estimated cost of works \$60,000.00.

10. Estimated time required to construct works..... Three years
 If well completed, describe works.

11. Estimated time required to complete the application of water to beneficial use..... Five years

12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.

Water will be used in a 10,000 ton per day heap leaching operation. Water from this well will be commingled with water from wells 1 and 3 -9 and Permits 44613, 44614, 44615 and 44616. Total annual consumptive use from all wells will not exceed 2.67 cfs (1200gpm expanded year-round or 1935.74 acre-feet per year).

Use of water will be 24 hours per day, 365 days per year.

APPROVAL

OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

No perforations shall be put in the production casing from ground level to 100 feet.

(CONTINUED ON PAGE 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and

not to exceed..... 2.67.....cubic feet per second, but not to exceed 461.26
million gallons annually.

Work must be prosecuted with reasonable diligence and be completed on or before..... November 4, 1987

Proof of completion of work shall be filed on or before..... December 4, 1987

Application of water to beneficial use shall be made on or before..... November 4, 1990

Proof of the application of water to beneficial use shall be filed on or before..... December 4, 1990

Map in support of proof of beneficial use shall be filed on or before.....

Completion of work filed..... IN TESTIMONY WHEREOF, I PETER G. MORROS
 State Engineer of Nevada, have hereunto set my hand and the seal of

Proof of beneficial use filed..... my office, this 4th day of November,

Cultural map filed..... A.D. 19.85

Certificate No..... Issued.....

(PERMIT TERMS CONTINUED)

The total combined duty of water under Permits 44613, 44614, 44615, 44616, 48782, 48783, 48784, 48785, 48786, 48789 and 48790 shall not exceed 461.26 million gallons annually.

This permit is issued under the preferred use provisions of NRS Chapter 534. The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.
